

How do we work at Horiens?

Written by: Horiens - 15/12/2022

Horiens has just launched the first episode of a series of videos which aims to present how it develops customized solutions for clients from the most diverse sectors of the economy in Brazil and abroad.

With more than 40 years of business experience, Horiens is formed by a team of specialists that brings together extensive knowledge and experience in the area of risk management and transfer, in addition to a solid relationship with the international insurance market.

The company's work methodology combines a deep and individualized look at each risk, the use of data intelligence through its risk lab, Risk Labs, and the close and dynamic partnership with each client from the beginning to the end of the process, that is, from the identification of the risk to the follow-up of the regulation of claims.

Watch the first episode

The first episode of the series, 'Together we anticipate the future', shows, in the voice of several members of the company, the way of working and being Horiens.
